

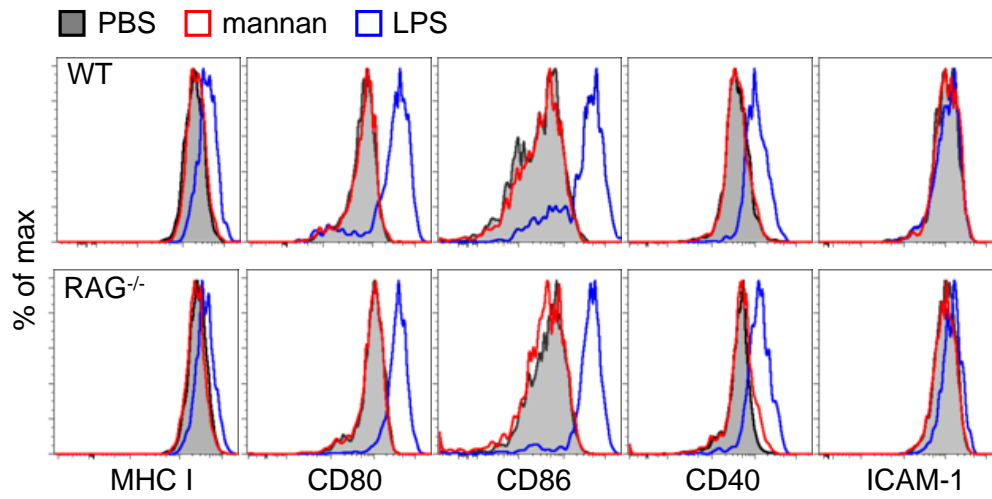

Figure S3

**Fig. S3. Injection of mannan from *S. cerevisiae* does not induce maturation of splenic cDC.**

WT and RAG-deficient mice were injected i.v. with PBS, mannan (200 $\mu$ g/mouse) and LPS (50 $\mu$ g/mouse). 16h later splenic cDC were stained with monoclonal Ab against surface antigens indicated on the x-axis of the histograms. Representative data are shown.
